Controlled quality, tested products and safe consumption from a single source.

Our services at a glance

Our Services

As an institution and service partner for tested quality, we deliver a comprehensive portfolio of services – from analysis to certification.

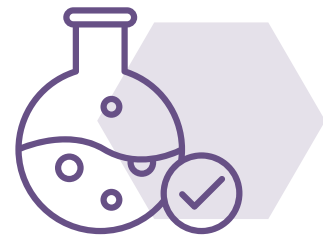

Analyses

Our laboratories enable customers to continuously monitor and assure their product and process quality and to develop new products. This extends from chemical and microscopic analyses to microbiological examinations and sensory assessments. Standardised reference methods, along with fast and cost-efficient screening procedures, add the finishing touches to our portfolio.

All LVA laboratories are accredited as testing laboratories according to EN ISO/IEC 17025.

Assessment

A team of experienced experts is at your disposal for the interpretation of laboratory reports and the preparation of assessments and certificates. Their competence also enables the clarification of issues relating to the Food Safety and Consumer Protection Act (LMSVG) at both national and international level without unnecessary red tape.

Inspection

Inspections along the entire value chain guarantee safe products. Our portfolio includes all kinds of business and hygiene inspections, as well as sampling according to standardised specifications (EN ISO/IEC 17020).

→ lva.at/inspection

Certification

Certification strengthens competitiveness. We check and certify adherence to national and international quality standards and legal requirements for the food industry and retailers, the logistics sector, catering, hospitality and institutional food services.

As an accredited certification body (according to EN ISO/IEC 17065), we also accompany businesses on their way to successful IFS certification.

Training & Consulting

Our training programme provides valuable support with practical courses addressing all issues within food processing. Speakers include international experts from government ministries, associations, universities and food regulators, as well as renowned auditors and consultants.

Certification according to ISO 21001:2018 guarantees that practical knowledge is shared in consistently impeccable quality.

Research

Innovation in the food sector demands expertise in many areas. TechNet, LVA's technology network, makes it easy for research and development projects to source competent support: From drafting a project or a funding application to actual implementation. Moreover, the LVA food testing institute has been a partner in national, international and EU projects for many years.
